THE MEDITERRANEAN TRADITION

In Goya Spain we have been working for **more than 40 years** to offer the best products of the **Mediterranean Diet**, the basis of a **healthy, rich and complete nutrient diet**, declared an **intangible cultural heritage of humanity by UNESCO**.

Everything begins on the olive farm where the raw material, the olive, is grown, following the best tradition of **Mediterranean flavors**. The final result, our olive oil, is characterized by its **bright color, aroma and freshness** that transports the consumer to the lands of Andalusia to convey the essence of the Mediterranean, and a balanced taste that makes it the favorite of millions of people in the world.

Therefore, both **our olive oil and our olives are awarded** year after year in prestigious international competitions.

Thanks to the production and packaging system with which we work in Goya Spain, each bottle of our olive oils contains the same great flavor during the shelf life of the product, without varying its aroma or its color. We follow the same recipe with which we inaugurated our first factory in Spain in 1974.

We are a leading brand in the export of olive oil, olives and capers, with presence in more than 20 countries worldwide.

We are part of the large Goya Family, the largest Hispanic food company in the United States. That's why next to a them, we return to say the motto that identifies us as a company:

*If it's **GOYA** ...it has to be good!*

QUALITY

International Certifications

Quality is the main value of the **Olive Oils** and **Olives** produced by Goya Spain. This quality is strongly endorsed by the certifications of international markets (ISO 14001, ISO 9001; BRC "AA grade"; IFS Food "Higher level"), tasting panels on which the company works, and competitions and prizes awarded by its consumers.
